11.	" H.S.Narasimha Murthy	..	Junior Engineer, Department of Fisheries, Bangalore.

MYSORE GOVT. ... No. 7669 2 NOV. 1962 ... DEPTT. (ANIMAL HUS...

The first meeting of the State Steering Committee of the Indo Norwegian Project, Mysore was held in the Chambers of the Minister for Agriculture, Forests and Co-operation, Vidhana Soudha, Bangalore on 12-6-1962. Shri B.Rachiah, Minister for Agriculture, Forests and Co-operation presided over the meeting.

In his opening remarks Sri B.Rachiah extended a hearty welcome to Dr. K.Sunannaa and Mr. Hareide to the meeting of the Steering Committee of the Mysore State. He expressed his pleasure and gratification at the assistance already given to India by the Norwegian Government through the Indo-Norwegian Project in Kerala State and now proposed to be extended to other maritime States including the Mysore State. He requested Dr. Sunannaa to convey the gratitude of the Government and the people of Norway. While appreciating the various provisions made in the plans for the furtherance of marine fisheries development in the State he suggested that salt curing and drying of fish should be given adequate attention as these methods of preserving fish were particularly suited to India conditions. He suggested to the Experts to try the new process of freeze drying of fish in the State and for this purpose supply the required equipment. He suggested also the use of refrigerated trucks for transport of fish by road as the chief fish consuming centres in the State were far removed from the producing centres on coast and were connected only by road. He requested Dr. Sunannaa to consider the possibility of supplying to the State Fisheries High Schools equipment such as engines, pilot canning and freezing plants etc., to teach subjects like fishing and fish technology.

Concluding his remarks Sri Rachiah said that he was particularly glad that Dr. Sunannaa had made it convenient to attend this meeting and they were glad to have the benefit of his advice. He once again extended a welcome to Dr. Sunannaa and Mr. Hareide.

Dr. Sunannaa expressed his thanks to the Minister for his welcome.

The items on the agenda were then taken up.

1. Consideration of the programme of development envisaged for Kanwar and approved by the Standing Committee.

Read and recorded.

11 5

2. Consideration of the plans and Estimates for the work to be undertaken at Karwar.

At the outset Sri Mathias said that he had gone through the proposals included under the second item on the agenda and they were generally acceptable to the Finance Department, provided that the expenditure was within the frame work of the III Plan.

Mr. Hareide explained that the basis of the present meeting was the Third Supplement to the Agreement between the Government of Norway, the United Nations Organisation and the Government of India which was signed in November last.

On the basis of experience gained in the Kerala State, the Indo-Norwegian Project authorities decided that they should try to expand and introduce the development work in other States also. At its last meeting, the Standing Committee approved the programme of work which is a sort of frame work within which the work has to be carried out. He was glad to note that the details of the programme had already been worked out. Generally speaking, he approved the proposals worked up and included in the agenda but he said that the main object of the present meeting was instituting the steering committee and giving it a start. He suggested that the administrative set up of the project in each State should be a separate unit under the administration of the Indo-Norwegian Project. He had brought with them some plans and estimates worked out as far as was possible at this stage. He suggested that the project office in the State should come into effect as soon as possible so that the work could be started without delay. Even though he was in general agreement with the proposals now put up, he was of the opinion that it would be more convenient to discuss the details at a later stage. There was considerable praliminary work to be done and as far as the Indo Norwegian Project authorities were concerned, besides the Mysore Project they had on their hands two other projects viz., the extension of the activities to Cannanore in Kerala State and Mandapam in Madras. It was necessary that the basic requirements of site and buildings should be got ready first and where the progress was quicker, it would be possible to implement the programme more quickly and to a greater extent. He suggested that for this purpose, it may not be always possible for the Project people in Cochin to come to Mysore

come to Mysore every time and it may be necessary that the concerned Officers from Mysore should be allowed to visit Cochin freely whenever necessary. Sri Mathias stated that since the first requirements were the preparation of the site and construction of buildings he anticipated no difficulty in getting on with the work. He suggested that the work could be entrusted to the P.W.D. which had men and resources at its disposal for speedy execution of the work. Mr. Hareide explained that it may be desirable for the Project to have its own engineering section. There should be an Assistant Engineer invested with the powers of an Executive Engineer and the Director of Fisheries should be empowered to give administrative sanction irrespective of the amount involved - with this arrangement it would be possible to get work executed quickly and smoothly.

Mr. Sunannaa emphasised that they wanted to find an arrangement which would ensure the best of co-operation with the P.W.D. It was found from experience that if the plans and estimates are prepared and the work entrusted to another agency for execution, they lose control over the progress of the work. In the Kerala State they had adopted out a procedure which was working out very well and he suggested that a similar procedure may be adopted in this State also. Otherwise, he was afraid that the work might be delayed. Sri Mathias said that the work was simple and of small magnitude and he was quite confident that it would be executed most speedily. However, if it was considered necessary that it should be got executed through a separate engineering section under the project authorities, he had no objection.

Mr. Hareide then explained that besides getting the site ready and buildings constructed there were two other points which would require immediate attention. They were water supply and electricity. He informed the members that the installations would require about 8,000 gallons of water per day or about 3 million gallons per year. The requirements of electricity were 200 KW. Out of which, about 125 kws would be required continuously. For emergency use, there

9/13

would be a generator unit of 100 Kws. It was decided that the Mysore State Electricity Board may be requested to sanction the supply. Sri Mathias suggested that the bore well equipment and a bull dozer available with the Director of Agriculture may be requisitioned for setting up a borewell and for levelling the land. The Minister agreed to the suggestion and instructed that action may be taken accordingly.

ITEM NO: 3: Creation of a Project Office at Karwar with staff for the implementation of the Project.

Mr. Hardikar explained the urgent need for appointing an officer who will be in charge of the Project and will take the responsibility for implementing the decisions of the Steering Committee. He should be designated as Asst. Project Officer. It was also necessary that an Assistant Engineer and a Junior Engineer should be appointed immediately. The proposals contained under Item No. 3 were approved and it was decided that the Assistant Project Officer to be appointed will work as Secretary to the Steering Committee.

ITEM NO: 4: Delegation of powers to the Director of Fisheries and other Project staff.

The various proposals for the delegation of powers to the Director of Fisheries and other Project staff for the speedy execution of the work were then considered.

(1) Appointment of Indian personnel:-

The proposal was approved.

(2) Purchase of Stores:-

The proposal was approved.

(3) Repairs to tools, Machinery, installations, Vessels and vehicles:

The proposal was approved.

(4) Construction works:-

The proposal was approved with the observation that instead of investing the Director of Fisheries with unlimited powers in regard to administrative approval to estimates and acceptance of tenders in excess of scheduled rates, he may be empowered with the powers now vested with the Superintending Engineer in the P.W.D. When the amount or the tender rates exceed these limits, the Director of

Fisheries should obtain the sanction of the Steering Committee. Similarly the sanction of the Steering Committee should be obtained for the departmental construction of works.

As regards the import by the Project of controlled articles like cement and steel, when such articles were not available and would result in delay in execution of work, it was explained that this procedure had been adopted in the Kerala State and had been approved by the Central Government. Dr. Sunannaa explained that the Indian Government would have to arrange with the import control authorities and customs authorities for permitting the import and clearance of these goods in such cases. Sri Mathias hoped that such cases would not arise and they would make all possible effort to obtain such articles in time so that the work will be executed speedily.

Dr. Sunannaa then referred to the proposal for carrying out experimental fishing included under Item (1), if the boats now being constructed by the Department of Fisheries were ready by next September it may be possible to start the experimental fishing immediately thereafter. Mr. Hareide informed that members that the recent survey by the Research Vessel "Varuna" indicated the existence of good trawling grounds off Karwar.

Winding up the meeting, the Minister said that the preliminary work may be proceeded with quickly so that the Norwegians can step in as soon as the site and buildings are ready.

Mr. Kalyani then proposed a vote of thanks to Dr. Sunannaa who attended the meeting in spite of the being busy with very important work at Cochin. He thanked also Mr. Hareide for his presence and advice. He then thanked the Minister for Agriculture, Forest and Co-operative for the interest shown by him in taking upon himself the conduct of the first meeting of the Steering Committee, for which

purposes he had to break camp and return to headquarters. He thanked also the Finance Secretary and Agriculture Secretary for their kind co-operation and active participation.

Dr.Sunannna expressed his appreciation of the hospitality of the Mysore Government. He wished a bright future for fisheries development in the Mysore State.

The meeting then came to an end.

(V.V.KALYANI)
Director of Fisheries
in Mysore, Bangalore-3.

Dated: June 1962.

VKS/19.7.62:
(Extra copies)

Fisheries Department - Formation of Information Project at the Mysore State - Implementation of the decision of the Planning Committee - Creation of the a Project office and its staff at Mysore.

Reference to the Government of India, Ministry of Food, Agriculture, Community Development and Co-operation (Department of Food) Letter No. F.4-2/62/Fish(Pol) dated 31st March 1962.

Copies to: ATD 4/5 GIS 62, Director of Fisheries, Mysore, Bangalore, Fisheries Adviser, Colombo.

Detail:-

1. Letter No. F.4-2/62/Fish(Pol) dated 31-3-1962 from the Director of Fisheries, Mysore, Bangalore.

Synopsis:-

The Director of Fisheries has stated that at the time drawing up the Fourth Programme for the Indo-Norwegian Project, Mysore State had an Inter-State Fish Seed Farm in the making. It was decided to create a project office at Mysore with a Fisheries Development Officer in charge of fisheries in the State and Norwegian Expert in charge of the Project.

2. The Director of Fisheries has requested sanction to the creation of the posts in the project office at Mysore for the period ending 31st March 1966. He, however, states that he proposes that one of each Fish Culturist, one Stenographer and one L.D. Clerk will not be filled up as present.

Details:-

The proposal of the Director of Fisheries is accepted and sanction is accorded to the creation of the following posts in the Project Office at Mysore for the period ending 31st March 1966. It is also directed that the posts may be filled only as and when the necessity arises as proposed by him.

S.No.	Designation	Classification
1.	Asst. Project Officer (Rs.400-25-500-EB-25-600)	One
2.	Fish Culturist (Gazetted Class II) (Rs.250-15-325-EB-15-400)	Two
3.	Junior Engineer (Rs.250-15-325-EB-15-370)	One
4.	Typist (Rs. xxx - xxx xxxx (150-8-190-10-270)	One
5.	L Division Clerks (Rs.110-5-150-6-180-10-230)	One
6.	Stenographer (Rs.110-5-150-6-180-8-220)	One
7.	Typist (Rs.80-3-11-4-130-5-150)	One
8.	LD Division Clerks (Rs.80-3-110-4-130-5-150)	Two
9.	Peons (Rs. 55-1-60)	Three

The estimated expenditure for four years is as follows:-

Particulars	Rs. in lakhs
1. Pay of staff ..	02.60
2. Allowances & Travelling Allowance ..	00.28
3. Office contingencies. ..	00.30
4. Allowances to Norwegian personnel ..	00.65
D/T ..	03.84

...2.

		Rs. in lakhs (Cr.)
	c/.	
Non-recurring:		
1. Construction of residential accommodation for the Norwegian personnel.	..	01.00
	Total:-	03.00

The additional expenditure over the current year is as follows:-

Recurring:		Rs. in lakhs.
1. Pay of staff	..	00.10
2. Allowances (prevailing allowance	..	00.02
3. Office contingencies, travel, furniture, stores & other contingencies.	..	00.12
4. Allowance to Norwegian personnel.	..	00.03
